IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1   1.   (Previously Presented)A method for providing one click printing, comprising:

2   providing a document identifier for a document to a print job acceptor using a single user

3   action; and

4   acquiring and printing the document by the print job acceptor based upon the provided

5   document identifier;

6   wherein the document identifier comprises a uniform resource locator.

1   2.   (Canceled)

1   3.   (Previously Presented)The method of claim 1 wherein the single user action

2   comprises clicking on the uniform resource locator.

1   4.   (Currently Amended) The method of claim 3 wherein the providing comprises

2   sending [[he]] the uniform resource locator to the print job acceptor.

1   5.   (Previously Presented)The method of claim 1 wherein the single user action

2   comprises displaying a context menu associated with the uniform resource locator and selecting

3   to direct print the document identified by the uniform resource locator using a single operation of

4   a cursor control device.

1   6.   (Original)   The method of claim 5 wherein the providing comprises sending

2   the uniform resource locator to the print job acceptor based upon the selection of the direct print

3   of the document.

1   7.   (Original)   The method of claim 5 wherein cursor control device comprises a

2   computer mouse and the single operation comprises depressing a mouse button to cause the

3   context menu to be displayed and releasing the mouse button with the cursor positioned over a

4   direct print menu selection to cause the direct print of the document identified by the uniform

5   resource locator to be selected.

1   8.   (Previously Presented)The method of claim 1 further comprising configuring an

2   application for one click printing prior to providing a document identifier.

1   9.   (Currently Amended)   The method of claim 8 wherein the configuring an

2   application for [[(Dne]] <u>one</u> click printing comprises installing an application plug-in for

3   interpreting the user actions.

1   10.   (Original)   The method of claim 9 wherein the installing further comprises

2   selecting a print job acceptor for providing one click printing.

1   11.   (Original)   The method of claim 9 wherein the installing further comprises

2   displaying a menu for selecting a print job acceptor for providing one click printing.

1   12.   (Previously Presented)The method of claim 9 wherein the installing further

2   comprises sending a query to all print job acceptors to determine whether a print job acceptor

3   supports direct printing.

1   13.   (Original)   The method of claim 1 wherein the providing a document identifier

2   for a document to a print job acceptor using a single user action further comprises selecting a

3   document, determining whether the selected document can be handled by the print job acceptor

4   and submitting the document identifier to the print job acceptor for acquiring and printing the

5   document when the document can be handled by the print job acceptor.

1   14.   (Original)   The method of claim 13 further comprising determining whether a

2   plug-in for handling the data is installed and submitting the document identifier to the print job

3   acceptor for acquiring and printing the document when the plug-in for handling the document is

4   installed.

1   15.   (Original)   The method of claim 14 further comprising displaying a menu for

2   selecting viewing or printing the document when the plug-in for handling the document is

3   installed.

1   16.   (Original)   A plug-in for providing one click printing, comprising:

2   an analyzer for analyzing a position of a cursor to obtain a document identifier associated

3   with a document to be printed;

4   an interpreter for interpreting a user's actions to determine when the user has selected to

5   print a document associated with the document identifier using a single user action; and

6   a pull print requester for sending the obtained document identifier to a print job acceptor

7   when the interpreter has determined that the user has selected to print a document associated

8   with the document identifier using a single user action.

1   17.   (Original)   The plug-in of claim 16 wherein the pull print request causes a

2   print job acceptor to acquire and print the document based upon the provided document

3   identifier.

1   18.   (Original)   The plug-in of claim 16 wherein the document identifier comprises

2   a uniform resource locator.

1   19.   (Original)   The plug-in of claim 18 wherein the single user action comprises

2   clicking on the uniform resource locator.

1   20.   (Original)   The plug-in of claim 19 wherein the pull print requester sends the

2   uniform resource locator to the print job acceptor.

1   21.   (Currently Amended) The plug-in of claim 18 [[whDrein]] <u>wherein</u> the

2   interpreter displays a context menu associated with the uniform resource locator and interprets a

3   users single operation of a cursor control device to direct print the document identified by the

4   uniform resource locator.

1   22.   (Original)   The plug-in of claim 21 wherein the pull print requester sends the

2   uniform resource locator to the print job acceptor based upon the user's single operation of the

3   cursor control device to direct print the document.

1   23.   (Original)   The plug-in of claim 21 wherein cursor control device comprises a

2   computer mouse and the single operation comprises depressing a mouse button to cause the

3   context menu to be displayed and releasing the mouse button with the cursor positioned over a

4   direct print menu selection to cause the direct print of the document identified by the uniform

5   resource locator to be selected.

1   24.   (Currently Amended) An article of manufacture comprising a program storage

2   medium readable by a computer, the medium tangibly embodying one [[c~r]] or more programs

3   of instructions executable by the computer to perform a method for providing one click printing,

4   the method comprising:

5   providing a document identifier for a document to a print job acceptor using a single user

6   action; and

7   acquiring and printing the document by the print job acceptor based upon the provided

8   document identifier;

9   wherein the document identifier comprises a uniform resource locator.

1   25.   (Canceled)

1   26.   (Original)   The article of manufacture of claim 24 wherein the single user

2   action comprises clicking on the uniform resource locator.

1   27.   (Original)   The article of manufacture of claim 26 wherein the providing

2   comprises sending the uniform resource locator to the print job acceptor.

1   28.   (Previously Presented)The article of manufacture of claim 24 wherein the single

2   user action comprises displaying a context menu associated with the uniform resource locator

3   and selecting to direct print the document identified by the uniform resource locator using a

4   single operation of a cursor control device.

1   29.   (Original)   The article of manufacture of claim 28 wherein the providing

2   comprises sending the uniform resource locator to the print job acceptor based upon the selection

3   of the direct print of the document.

1   30.   (Original)   The article of manufacture of claim 28 wherein cursor control

2   device comprises a computer mouse and the single operation comprises depressing a mouse

3   button to cause the context menu to be displayed and releasing the mouse button with the cursor

4   positioned over a direct print menu selection to cause the direct print of the document identified

5   by the uniform resource locator to be selected.

1   31.   (Currently Amended) The article of manufacture of claim 24 further comprising

2   [[configu ring]] configuring an application for one click printing prior to providing a document

3   identifier.

1   32.   (Original)   The article of manufacture of claim 31 wherein the configuring an

2   application for one click printing comprises installing an application plug-in for interpreting the

3   user actions.

1   33.   (Original)   The article of manufacture of claim 32 wherein the installing

2   further comprises selecting a print job acceptor for providing one click printing.

8

1   34.   (Original)   The article of manufacture of claim 32 wherein the installing further

2   comprises displaying a menu for selecting a print job acceptor for providing one click printing.

1   35.   (Original)   The article of manufacture of claim 24 wherein the installing further

2   comprises sending a query to all print job acceptors to determine whether a print job acceptor

3   supports direct printing.

1   36.   (Original)   The article of manufacture of claim 24 wherein the providing a

2   document identifier for a document to a print job acceptor using a single user action further

3   comprises selecting a document, determining whether the selected document can be handled by the

4   print job acceptor and submitting the document identifier to the print job acceptor for acquiring

5   and printing the document when the document can be handled by the print job acceptor.

1   37.   (Original)   The article of manufacture of claim 36 further comprising

2   determining whether a plug-in for handling the document is installed and submitting the document

3   identifier to the print job acceptor for acquiring and printing the document when the plug-in for

4   handling the document is installed.

1   38.   (Original)   The article of manufacture of claim 37 further comprising displaying

2   a menu for selecting viewing or printing the document when the plug-in for handling the document

3   is installed.
